

Sprint 2

Backlog	Estimation in hours (per person)	Total working hours	Status
Running Sample Programs Using EV3 Brick	5	25	Done
Intalling EV3 Programmer	5	25	Done
Installing Java JDK, Lejos And Eclipse	3	15	Done
Getting Familiar With Java Lejos By Writing Basic Program	18	90	Done

- We can try playing with mindstorm brick to get better understanding by writing basic programs which is necessary.
- We programmed EV3 using EV3 SD card creator,done in following steps.
- We downloaded Java Jdk respective to our operating system and then installed it on our system.
- Then we downloaded and installed it on our system Lejos EV3 SD card creator from the Lejos official website
- After insertion of Memory card(Max. of 32 GB) ,we opened SD card creator which needs Java Jdk file(.Jar).
- With inclusion of .jar file we created files on Memory card ,Lejos Ev3 uses these files to understand our Java coding.

We are ready with EV3 brick.
