

Sprint 4

Backlog	Estimation in hours (per person)	Total working hours	Status
Creating Lejos Project Using Eclipse	6	30	Done
Learning Java Programming	25	125	Done

For this sprint we started getting more involved into programming.

In order to write required programs (etc.touch,distance and colour),we should have some experience with programming.

And then now we can start creating Lejos project using Eclipse.

Issues occurred:

Normally Eclipse uses latest version of execution environment i.e 1.8JRE.But in order to be compatible with mindstorm we should use 1.7 JRE in the preferences while creating a project
